

# Flu Vaccine Information

The following information has been put together to assist health plan members who will be obtaining flu shots this year. Flu shots are eligible for 100% coverage under the health plan preventative care benefit when received from a network provider. Here's how:

For All Health Plans: If you receive a flu shot at your physician's office and the physician bills for an office visit in addition to the flu shot, there will may be an office visit copay. However, if your physician's office has a flu shot clinic where a patient may go in at certain times to see a nurse and receive a flu shot, the flu shot and administration is covered at 100% and there would not be an office visit copay. Ask the provider's office how the service will be billed before services are provided. For details on your particular health plan:

## **Blue Cross Blue Shield of Kansas (BCBS)**

A flu shot is covered when it is performed by an eligible provider no matter where they are providing the service. An example could be: Topeka Shawnee Health Department goes to Landon Middle School and provides flu shots. Since this is an eligible provider, the flu shots they provide can be submitted to BCBS for coverage under the member's coverage. Flu shots provided by Dillon's, Walgreens, Wal-Mart etc. are not covered as these are not eligible providers. For additional information on eligible providers, please contact customer service at: 1.800.332.0307.

## **Coventry**

Flu shots are being offered at no charge in some community locations around the state. Coventry indicates they are working with the following companies to provide flu shots:

[Maxim Locations - www.findaflushot.com](http://www.findaflushot.com)

Costco

Target

CVS

Coventry is continually updating their website with the latest information on dates, times and locations. They will have updated links for eligible vendors on their website soon. Members will need to search by their zip code to find available providers. Members need to double check dates as all dates are dependent on the availability of flu vaccine.

For information regarding these locations please check the Coventry website at [www.chckansas.com](http://www.chckansas.com). Please check each community location for specific age requirements related to children and adolescents. You must present your Coventry member ID card to receive a flu shot. Please visit or contact a community location near you to check their individual schedules. For questions on eligible providers, please contact customer service at: 1.866.611.7337.

In addition to the community flu shots, your doctor may provide flu shots at their office, however if an office visit is billed an office visit copay will apply. Check with the clinic before services are provided.

## **Preferred Health Systems (PHS)**

Flu shots are covered at 100% at contracting providers. Any office visit charges would be subject to the applicable office visit copay. Most retail locations such as grocery stores or pharmacies would be non network benefits and therefore not covered. For specific questions on eligible providers, please contact PHS customer service at: 1.866.618.1691.

## **UMR, A UnitedHealthcare Company**

\*For specific questions about coverage, please contact your health plan directly.

Additional Resources (may or may not be covered by your insurance)

All local health departments provide flu shots to members of their community. Health department contact information can be found at [http://www.kdheks.gov/olrh/download/health\\_directory.pdf](http://www.kdheks.gov/olrh/download/health_directory.pdf).

The KDHE Flu website has a link to the American Lung Association FluFinder website. <http://www.kdheks.gov/flu>.

Many pharmacies across the state administer flu vaccine to adults.
